

PARKING MAP 2021

Starting Monday parking will be enforced. Please do not park where it says no parking.

Primary Building - Building openers and leads should fill up the spots in the parking lot. After that everyone else will need to park in the designated spots on the street as well as across the street near the Infant/toddler buildings. We need to make sure there is always ample parking for our parents. If you park along the street please observe normal parallel parking (some spaces do have the painted lines to help with parking). If you do not feel comfortable parking along the street, please park near infant toddler building.

If you have questions about where to park, please contact a member of admin.
